

The Infinity Group Management Recognition Program

Pictured Above: Jack Kennon, Dean Mezger, Jimmy Moon

Date: 8/2/2012

Employee Name(s): Jimmy Moon, Jack Kennon, Dean Mezger

Superintendent: Tony Lewis

Company: United Electrical & Instrumentation

Intervention Description: Jimmy Moon and his crew did a great job installing Jumbo EDC's new intercom system. We were very impressed by their obsession with cleaning up, not just after, but during every task of the job. All of the UEI employees were respectful of Dow personnel, and other contractor employees. We needed the intercom system fully operational before turnaround started and UEI did what it took to make that happen for us. Jimmy Moon also self-initiated work to eliminate a "hum" in the system that he noticed after it was installed that could have just been written off as "normal". This was especially impressive. His obsession with making sure the job was finished right has provided Jumbo EDC with an outstanding intercom system.
