Date: 4/16/2013

Employee Name(s): Gary Blumberg

Superintendent: Scott Kubisiak

Company: United Electrical & Instrumentation

Gary Blumberg has been converting the old war wagon trailers into standard lowboy trailers. In the process of reviewing the condition of a trailer he noticed that the U-bolt's had rusted into the axle creating a serious safety hazard. It was a great catch by Gary! Trailers can be exposed to some very harsh elements and should be inspected prior to moving...especially if they are being taken out onto the public roadways. Gary's, thanks for your diligence.

Bob Kotrla – Regional Safety Manager, United Electrical & Instrumentation
