

The Infinity Group Management Recognition Program

Pictured Above: Tim Burch and Carlos Alaniz

Date: 1/10/2013

Employee Name: Carlos Alaniz

Superintendent: Tim Burch

Company: Infinity Construction Services, LP

Carlos was in the process of taking some pipe measurements when he noticed another crew was preparing to build a scaffold near water. Carlos intervened with the other supervisor to verify that the paperwork was complete to perform the work. After reviewing the documents that were issued by Operations, Carlos noticed that a document was missing to perform work near/over water. The work was stopped and the client's safety department was notified to complete the proper documents.

Thanks Carlos for taking the time to intervene and question a job in progress to "just verify" that a job was planned properly.

Frank Mejia – Infinity Construction Services, LP - Safety Director
